ALSO with each order of one of these collections we will include at least one bulb of a variety worth \$2.00 or more. No doubt you will find more than one with the larger assortments.

PLEASE READ CAREFULLY BEFORE ORDERING

TERMS FOR ORDERING — All orders cash with order or, 25% down payment, balance C.O.D. All C.O.D. orders require a down payment. All orders from the retail list will be sent postage prepaid. Orders from the wholesale list will be sent F.O.B., Springfield, Mass. If bulbs from both lists are ordered they will be sent F.O.B. and we will include enough extra bulbs to more than offset the express charges. All orders accepted subject to prior sale.

Orders for bulblets cannot be accepted after April 15th, for small bulbs (sizes 4, 5, & 6) after May 1st, and for large bulbs after June 15th. Orders for assortments can be accepted until July 1st.

DISCOUNTS — On all cash orders from the retail descriptive list — \$2.50 to \$10.00 — you may select 10% discount in bulbs of your own choice. \$10.00 to \$20.00 — you may select 15% discount in bulbs of your own choice. Over \$20.00 — you may select 20% discount in bulbs of your own choice. Discounts do not apply to new introductions, collections, or wholesale prices.

On cash orders from the wholesale list — 5% discount on orders from \$25 to \$100. 10% discount on orders over \$100.00.

EXTRAS AND OVERCOUNT — We give extras with all orders varying with the size of the order. Just mention some of the varieties you would like to buy and we will do our best to please you. We are noted for our generous overcount of number, quality, and size.

GUARANTEE — We guarantee satisfaction in every way possible. We attempt to send out only clean, healthy, true to name stock, and if in any way you are not satisfied let us know immediately and we will do our utmost to please you. Also if you are pleased we are always glad to hear from you.

SHIPPING DATES — Unless otherwise requested retail orders will be sent out between March 15 and April 15 in the order received. Wholesale orders will be shipped as soon as possible after receiving them. *Order early so as to be sure we are not sold out of the varieties you want.* This also gives us more time to fill your order with less chance of error and less overtime.

BULB SIZES — The retail list contains three sizes —

Large 1 $\frac{1}{4}$ " up

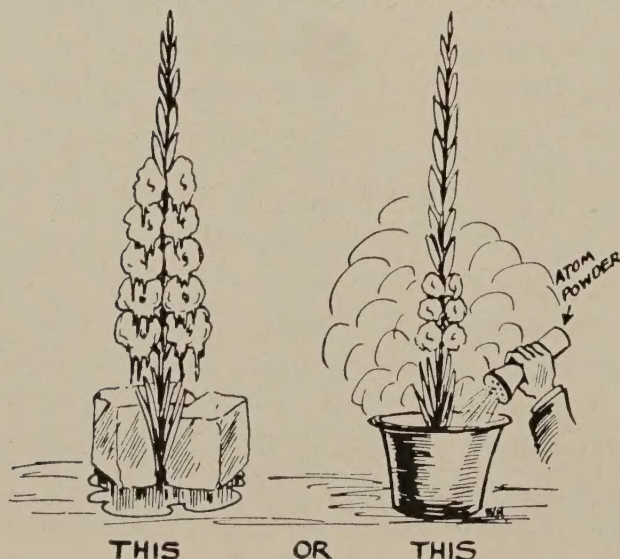

Medium, $\frac{3}{4}$ " - 1 $\frac{1}{4}$ "

Small, $\frac{3}{8}$ " - $\frac{3}{4}$ "

Large size bulbs give the largest bloom. However, medium sized bulbs will give excellent spikes about 75% as large. Most small bulbs will bloom and at the same time grow fine bulbs for the following year.

VARIETY LISTING — In the descriptive list the variety name is given first, followed by the originator's name, its show classification and the approximate number of days needed for it to bloom. We have attempted to give a description of the varieties as we see them, listing important faults as well as good points.

TIMING SPIKES FOR EXHIBITION

Due to the continued rise of costs in general, we will be unable to accept orders for less than \$2.50. Smaller orders can only be filled at a loss to us.

DILEMMAS OF A GLAD GROWER

Along about this time of year,
I moan and groan and shed a tear
And wish I were some lucky dog
That never writes a catalogue.

A thankful fellow I should be
And also note your precocity
For purchasing your bulbs from me
That naturally are top quality!

I notice, too, how Mother Nature
Has blessed our planting of every acre,
So every bulb is sure to be
Full of Pep and Vitality.

But a guy must learn to classify,
Bust into print and tell 'em why
If he would garner in the dough
And cop Blue Ribbons in the show . . .

At night I lie awake in bed
And write about a "cabbage head"!
It grows So-o-o Big! as sure as fate
Easily the size of a dinner plate.

The Super-Duper, Ain't it Grand!
The one best bet in all the land —
In one short year it's sure to be
Twice as popular as Picardy!

My spiel should move some reader fair
With Jane Russell form and auburn hair
To buy a bulb of Noweta Rose
Instead of powder for her nose.

Must gild the lily with language fair,
Yet five buck bulbs amount to a dare,
Still, men can't live without a hope —
Just lamp Page Six for all the dope!

Since men don't live by bread alone,
Their gardens need some color tone
That glads both new as well as old
Would furnish beauty for the soul!

'Tis fun to tell you what is best
To plant in gardens east or west,
But when it comes to thrips and lice,
Ah — let's stick to talk of blooms so nice!

P. S.

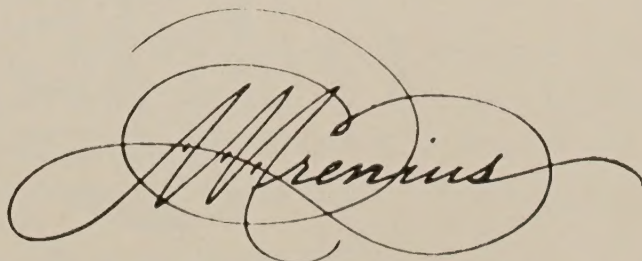

A little later in the Spring —
With all your orders pouring in.
I find I'm out of this or that,
And going crazy as a bat.

Trying to ship immediately.
What I can't ever possibly —
Why I just wear a silly grin,
And thinking back, I'd bet a fin.

In writing up that catalogue
Was I such an unlucky dog?
It couldn't be as tough as this —
We'll aim to please, nevertheless!

Just for a change, thought I would break out in doggerell verse (with apologies to the late J. D. Long) instead of my usual formal Foreword. Actually, it's a pleasure and a lot of fun in getting up a glad catalogue except for the lack of space and perhaps our lack of proper words. We do not like to praise unduly or criticize unjustly, but we do think you will find our list contains a most comprehensive listing of the better varieties. We still believe — only the best is good enough!

Sincerely,

FAVORITES OF 1951

Here are four lists of varieties representing each person's favorite ten as they saw them this year. Mrs. Arenius and Helen (Mrs. Art, Jr.) both have seen all the varieties in our field as well as at the many shows so are well qualified to comment. They have the added advantage of liking a glad only because to them it is the most beautiful without the influence of statistics such as the size, number open, number of buds, height, etc.

— Athol, Mass.

"Very late in telling you how much I appreciated your nice bulbs also your generous amount of extra bulbs. I won a blue ribbon on BURMA and CHAMOUNY." — Hanson, Mass.

APPRAISING THE NEW ONES

I shall confine my remarks mostly to the newer varieties, believing that the older varieties are too well known to need comment. However, let me say, in many instances the newer varieties are no better, and perhaps not as good as many of the old stand-bys.

Of the new whites, WHITE SYMPHONY and MOTHER FISCHER look very promising. Both are ruffled with good texture, tall and well placed, and should prove excellent for exhibition or commercial uses. SILVER COURT is a clean white that impressed me with the purity of its color and is a welcome addition for that reason. For all around performance FLORENCE NIGHTINGALE still ranks very high. FREEDOM in the blotched whites continues as a leader.

CREAM ORCHIDS, LEIF ERICKSON, and PROF. GOUDRIAN are welcome new-comers to the cream class, but I do not believe they can beat well grown spikes of CONNIE G or LEADING LADY for exhibition purposes. In creams with throat markings, our favorites are LA VALLE, SALMON'S GLORY, SINCERITY and SPARKS.

The yellows are coming so fast that it is hard to keep up with them. Two new ones impressed us as being outstanding: GELBER HERCULES, a new one from Holland, is a large, vigorous, very-tall, medium yellow, opening up to 8 well-attached blooms, and seems a yellow of great promise. GOLD, undoubtedly has the purest, richest color of any yellow — a tall robust grower, but unless well grown, flower head is inclined to be short. BONANZA is the largest of the early yellows, grows tall and propagates especially well. TERRIFIC has the ability to open up to 12 medium sized blooms with faint red lines and will become a heavy show winner when stock becomes available. ROBERT ALAN, SUNDANCE, LANCELOT, GENE, LODESTAR, and YELLOW HERALD are all fine yellows and destined to become leading commercials. The best of the blotched yellows are PERDITA, MANCHU, and SPOTLIGHT.

QUIBERON vies with PATROL for first honors in the buff class. In spite of a tendency to crook, QUIBERON will win many championship honors. The much heralded MARATHON proved a disappointment. Of the older ones, SUNSPOT, PACTOLUS, SUNLIGHT, and WILMA DITTMAN are still going strong and winning Blue Ribbons.

In the orange class, a new one that looks good is Wilson's COUNTRY CLUB and will offer competition to CIRCE, probably best in this class. BETTY DUNCAN looks best to us in the 300 class. Of the older ones, we think highly of CHIEF PONTIAC, HENRI DE GRIEVE, DAISY MAE, ORANGE GOLD, and OCTOBER SUNSHINE.

Of the salmons, we think our own PINK PRIDE will step into the front ranks. LUXURY seems to have the size and color value to become a fine exhibition variety. MAJESTIC and PHAROAH are both excellent varieties, very tall and robust. POLNESIE with its ability to open up to 10 well placed blooms will win its share of honors. GORGEOUS DEB is one of the most beautiful as well as ruffled varieties in existence. This class has a long list of excellent varieties and the following cannot be omitted: BOLDFACE, DIEPPE, KING ALFRED, DOLLY VARDEN, GEN. EISENHOWER, and CORDOVA.

SAN SOUCI, in the scarlet class, struck us as having the nicest and purest color we've seen in a long time. HAROLD K, RED CHERRY, and RED WING were all very outstanding in our garden. Other scarlet reds that performed well were DANCING FLAME, nice clean color with slender stem, BONFIRE, robust and brilliant, ESQUIRE, strong growing, FLAME GIRL, beautiful color, and FIRE GLEAM which opens up to 10 blooms.

In the long list of pink glads, it is most difficult to pick out any particular variety as tops — there are so many that are outstanding! However, the following in alphabetical order take the limelight: BOISE BELLE, a beautiful pink and yellow blend; CLARENCE D. FORTNAM, heavily ruffled blush pink; EVANGELINE, tall, robust beauty; MISS HOLLAND, the new pink sensation from across; SHEHERAZADE, another outstanding Holland variety with blotch; SILCHERLIED, very outstanding in our garden this past summer; SKYWAY, early tall commercial; SWEET 16, a sport of Beauty's Blush, but a real honest-to-goodness blush. Of course, we can't omit the older CONN. YANKEE, still winning grand championships; JUNE DAY, earliest pink; FRIENDSHIP, lovely and early; MARION PEARL, one of our favorites, and PHANTOM BEAUTY. There are many other good ones, and I hope I haven't left out your favorite.

The red class has been augmented by such sterling varieties as BIG JOE, DEE TWELVE, LEAH GORHAM, and POINSETTA. From the reports reaching us, DEE TWELVE is destined for a great commercial future because of its tall, strong growth and purity of color. POINSETTA also has commercial value. Of the older ones, still going strong are MID AMERICA, easily winning blue ribbons; GRACIE ALLEN, beautiful clear red; FIREBRAND; BIRCH RED; NANCY; and RED CHARM.

The best dark red in our garden this summer was DARK DAVID which will give HAMLET competition for top honors. Other varieties that performed well and won many Blue Ribbons were RUFFLED KNIGHT, best ruffled dark red, BLACK CHERRY, CAPT. KIDD, and BLACK PHANTOM which also produced fine spikes.

GLAD TIDINGS, our introduction this year, gave us our biggest thrill in the rose class. I'm sure you'll agree when you see it. ROSY FUTURE and ELMER'S ROSE produced splendid spikes. For exhibition purposes it is hard to beat a well grown spike of NOWETA ROSE. MACHUSLA and MADELINE HEFTY both made tall spikes of well placed blooms. The following old timers performed well this summer: TOPFLITE, cut hundreds of beautiful spikes; MISS WISCONSIN; BURMA, constant Blue Ribbon winner; GIANT CYCLAMEN; MODERN TIMES; PREVIEW; and VENIDA. LILA WALLACE is unexcelled for baskets and home arrangements.

Of the newer lavenders, SUBLIME and ORCHID FANTASY impressed us most. SUBLIME is a clear medium lavender on a tall slender spike. ORCHID FANTASY, pale orchid shade of perfect placement with 6-8 open, should prove valuable commercially. BRIDAL ORCHID flecked some, but is a strong grower with many open, making good exhibition spikes. SUNDAY BEST, perhaps more lavender than rose, is proving an exceptional commercial because of its strong growth and good color value. It never crooks and is an exceptional propagator. ORCHID MARVEL gave us lovely, clear lavender spikes; ORCHID LADY is a tall, early commercial; LAVENDER LACE, a beautiful, ruffled light lavender. Of the older varieties and still good are PARTHIENA, a winner in its class; BENJAMIN BRITTEN; ABIGAIL; LAVENDER PRINCE; and ELIZABETH THE QUEEN — all fine commercials. WEDGEWOOD, a 300 glad, is acknowledged one of the most beautiful lavenders and a must-have for arrangements and a useful glad for Florists.

In one short year KING DAVID seems to have reached top place in the purple class. KASHMIR also impressed us — a very beautiful and ruffled glad with wonderful color value. Watch KAREN go places because of its distinctive coloring, although I'm not sure it belongs with the purples. The following rank in our older favorites: SHERWOOD, DOROTHY ARMSTRONG, LANCASTER, PURPLE SUPREME, KING LEAR, and VULCAN — these still win at the shows.

BLUE DEVIL seems to be the most talked about blue because of its striking color combination of deep violet with a rose blotch on a cream throat. BLUE BONNETT and LIBRETTO are the best of the light blues. RAVEL makes the best spikes but its health seems questionable. We grow BLUE BEAUTY, HIGH LIFE, and MAX REGER for commercial use. This is still our weakest class.

Of the newer smokies and any other class, we like STORM TERROR and SALAMANCA, both light orange smokies of strong, tall growth and seemingly capable of winning at the shows. I think GRAY SUMMIT the best of the gray smokies. PERSIAN RUG is a blending of deep brown tones that is unusual and beautifully striking. Other smokies which rate high with us are: CHOCTAW, TUNIAS, MOHAMED, FLYING FORTRESS, DUSTY MILLER, HIGH FINANCE, and BUCKEYE BRONZE.

"The bulbs you sent me last year were lovely, and I am going to try them again this year. The colors were simply grand, and folks down this way had not seen such unusual colors before." — Great Falls, So. Carolina.

1952 INTRODUCTIONS

GLAD TIDINGS (Arenius) (460)

Seedling 48183 (Conn. Yankee X Fuchsia Belle)

A clear, soft rose. A beautiful color which we have been watching for the past three years. The increase and bulblet growth has been so good that we are putting it on the market earlier than had been planned. About 55" to 60" tall, "Glad Tidings" grows straight and sturdy and opens 6 to 7 5" to 5½" blooms of perfect double row placement. This we think is the finest of the rose colored glads and well worth watching.

Each Large \$5. Medium \$4. Small \$3. Bulblets \$1.

PINK PRIDE (Arenius) (530)

Seedling 48132 (Miss Wisconsin X Buena Vista)

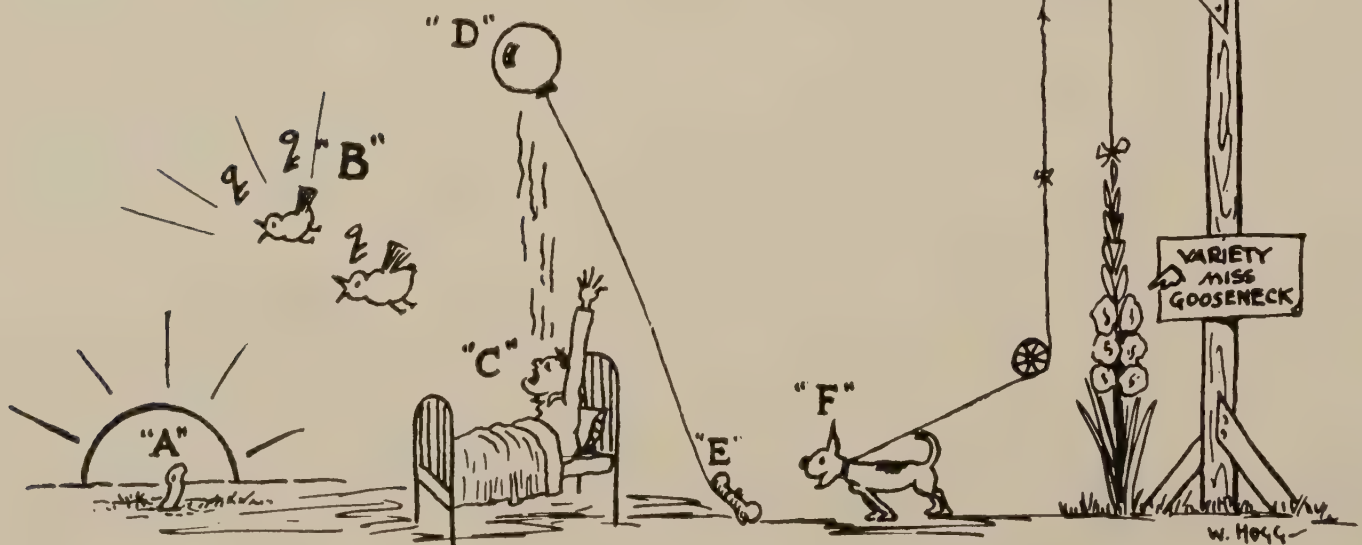

A strong growing light rosy salmon of extremely heavy substance. Opens 8 to 9, 5½" to 6" blooms on an 18 to 20 bud flowerhead. Very formal placement of wide open blooms. Bulblet production is heavy with good germination and growth. Plant growth is unusually husky and healthy, which, along with the heavy texture and strong attachment of the blooms, should add to its desirability as a cut flower.

Each Large \$5. Medium \$4. Small \$3. Bulblets \$1.

HOW TO GROW STRAIGHT EXHIBITION SPIKES !

Rising sun makes worm "A" turn and causes birds "B" to sing awakening cataloguer "C" whose hot air about new variety causes balloon "D" to rise moving bone "E". Dog "F" reaches for bone thus pulling string to keep spike straight.

POINSETTIA

From Week's Gladiolus Garden

Parentage — Tip Top X Unknown.

Color — Pure light spectrum red slightly ruffled.

Class — 450 Blooming time 85-90 days.

Height of spike over all 50 to 55 inches. Up to 21 bud count with five to seven open with 25 inch flower head.

Stem medium, always straight and stands heat well without crooking. Opens well from tight bud making it an extra good commercial variety with excellent keeping qualities.

Propagation good with bulblet germination fair from bulblet stock bulblets. Stock bulblets hard to germinate, but if held over one year will come perfect.

Tested in 1950 NAGC trial gardens. Out of 61 seedlings tested, five were approved by the judges and POINSETTIA rated third of the five approved. Also given okeh on Florida disease test.

Bulblets 20c each, \$15.00 per 100. One half pint \$100.00.

KAREN (Mazur)

From Birchville Gardens

Here is an outstanding new novelty for 1952. It is such an unusual variety that I am sure it is destined to go places, both as a commercial cut flower and for exhibition, and for the home garden.

COLOR — Clear medium magenta shading lighter toward the throat, with the three lower petals having a large sulphur yellow throat.

FLORETS — 6 to 8 well placed five inch florets open on an 18-21 bud spike with six more showing color, with a flowerhead of 28 inches.

STEM — Not heavy but strong, and straight, the florets are firmly attached making it easy to handle.

SUBSTANCE — Unusually good and stands up well for a long time. Spikes shown at Western Massachusetts show were held for 10 days and were still good at the end of the show.

RELIABILITY — Very reliable in all ways, wherever grown. A heavy or good propagator, good grower and uniform bloomer from large or small bulbs and it is healthy.

Spikes of KAREN were shown at the large Western Massachusetts show where it received an Award Of Merit and also was the most popular variety in the show by public vote.

AT the RHODE ISLAND trial gardens this received the highest score for the year .85 in a very trying season.

Prices for 1952

HOWARD V. WRIGHT (Kadel)

From E. A. and E. F. Quackenbush

Class 410

Seedling X-48

Parentage — SPOTLIGHT X [MYRNA X (MAMIE X NEW ERA)]

HOWARD V. WRIGHT is light yellow with a somewhat deeper throat. It opens eight 5" florets with five more showing color on a 20-bud spike. Length of flowerhead is 29". Its wide-open florets have plain, recurved petals. Blooms in 82 days.

Plant is strong and vigorous with broad, deep green foliage. Bulblet production and germination are excellent.

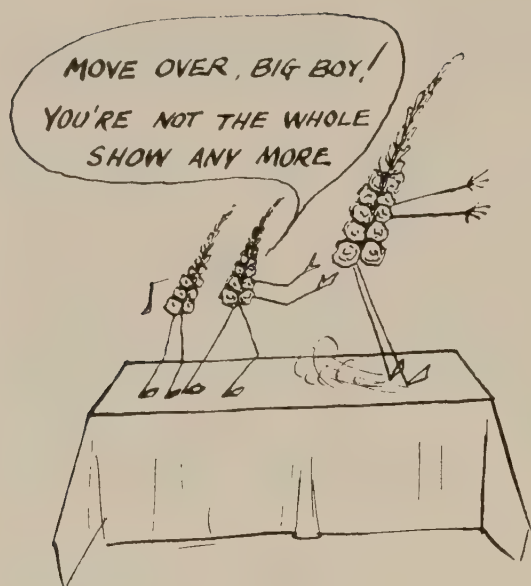

Awards —

1949, "A" rating and best seedling, Keystone.

1950, "A" rating and runner-up for best seedling, Maryland.

1951, American Home Achievement Medal, Maryland and Eastern International.

Price — \$5.00 per bulb for any size bulb, with the privilege of buying 10 bulblets for \$5.00 with each bulb purchased.

DESCRIPTIVE LIST

In order to give more space to the descriptions of the newer and less known varieties we have divided the general variety listing into two sections. The first section starting on this page contains the best of the proven exhibition and commercial types, and are priced as follows:

Large, 2 for .25, 10 for \$1.00; Medium, 3 for .25, 10 for .65;
Small, 10 for .35; Bulblets .25 pkg.

ALGONQUIN (Palmer) (536) 80

Fine scarlet red that has been a standard variety for many years. Still takes its share of blue ribbons. Good home garden scarlet.

ABU HASSAN (K&M) (378) 80

Very deep violet blue. Of medium size but the best of its color. Always popular.

ANNA MAE (Pommert) (400) 75

Early pure white. Valuable as a cut flower where pure white is necessary. Soft texture but large blooms.

ARIADNE (Mitsch) (401) 85

White with a striking red throat. Always draws attention with its vivid contrast of color. 6-8 open of good placement.

ATHLONE (Palmer) (416) 80

Clear light buff. A beautiful color on a spike with 10-12 blooms open at once.

BEACON (Palmer) (436) 80

Striking scarlet and cream bicolor. 8-10 blooms open on a tall spike. Well liked for all uses.

BEAUTY'S BLUSH (Fischer) (440) 85

Clean light blush pink opening 8 round recurved blooms. A strong grower that is outstanding as a cut flower. A fine keeper after being cut. One of the best pinks.

BIG TOP (Rich) (541) 85

HIGH LIFE (K&M) (376) 80

Early light blue with deeper throat. 8 blooms open on a tall spike. Fine color.

HUNTRESS (Jack) (466) 75

Early light pinkish lavender. One of the best for early cutting making consistent saleable spikes then.

INVICTUS (Owen) (441) 70

Beautiful blush white with a rose blotch. One of our favorites for early blooms.

JAVA (Salmon) (512) 75

Very large and early clear yellow. Of loose attachment tho about the largest yellow.

KING ALFRED (Hobbs) (532) 885

Tall salmon pink with a lighter throat. Will open up to 8 slightly ruffled 6" blooms on a 5½' spike. Good show record and an excellent cut flower.

KING LEAR (Palmer) (470) 80

Most popular ruffled deep purple. 6-7 well placed blooms on a tall plant.

KING WILLIAM (Schnetsky) (530) 85

Light salmon blending to a cream throat. Opening 6-8 blooms on a five foot spike, this is one of the best glads in its color.

LADY JANE (Lake) (406) 80

A clear cream with a yellow bottom petal. Excellent all round glad.

LANCASTER (Palmer '44) (470) 85

Beautiful true purple. An excellent grower that we like very much.

LANTANA (Palmer) (420) 75

Beautiful blend of orange and yellow. Tho only of medium height its beauty and good habits make this a fine variety. Early.

LARIMIE (Wilson '42) (425) 90

Vivid deep orange opening up to 8 blooms on a medium height spike. If you like the deep bold colors you will like this.

LAVENDER PRINCE (LaSalle) (466) 80

Tall deep lavender cut flower. Opens 6-8 blooms on a 5' spike. Widely grown as a cut flower due to its easy tall growth in a color class that lacks height.

LAVENDER QUEEN (Arenius) (366) 85

An old time standard deep lavender. 6-8 open on a tall spike.

LEADING LADY (Johnston) (506) 90

Outstanding creamy white sport Picardy. Opens up to 8 large blooms on a tall spike. A leading blue ribbon winner and a top notch cut flower.

Huge rusty brown variety opening 8 on a tall spike. Fine for exhibition.

RED CHARM (Butt) (452) 85

Medium deep red opening as many as 9 blooms on a tall spike. A good blue ribbon winner and one of the most consistent growers.

Large, 2 for .25, 10 for \$1.00; Medium, 3 for .25, 10 for .65; Small, 10 for .35; Bulblets .25 pkg.

ROI ALBERT (Lemoine) (380) 85

Here's an unusual one. Smoky brown with a contrasting red and yellow throat. Up to 8 medium sized blooms on a tall spike. The oldest one in our list.

ROLLA (Kaylor) (480) 85

Reddish purple smoky overlaid with orange. Up to 8 open on a tall spike. Really different.

ROSA VAN LIMA (Pfitzer)

Clear light rose pink. Widely grown for early blooms and hard to beat anytime.

ROYAL WINDSOR (Beaton) (550) 85

Very large bright red opening up to 8 blooms on a 4' spike. Consistent maker of fine formal spikes.

SALMONS GLORY (Salmon) (507) 80

Beautiful cream with a deep red throat. Open 8 on a tall straight spike. Certainly one of the best for all uses.

SILVER WINGS (Ritsenia) (500) 90

White sport of Picardy. Opens 8 slightly ruffled blooms on a tall spike. Widely grown commercially and rightfully so.

SNOW FLURRY (Clark) (400) 85

Tall white sport of Picardy. A fine easy grower of commercial value.

SNOW PRINCESS (Pfitzer) (400) 75

Early standard white with a creamy throat. Still widely grown. Consistent spikemaker.

SPARKS (Glass) (506) 90

Showy deep cream with a deep orange blotch. Open 7-8 very large triangular shaped blooms on a tall spike. One of the best.

SPOTLIGHT (Palmer) (413) 80

Deep yellow with a small red throat blotch. Opens 8 on a tall stretchy spike. Wonderful consistent grower. Best of the yellows for cut flower purposes.

SUNKIST (Errey) (423) 85

Glowing apricot pink shading to a cream throat. 8-10 open of good placement. A fine variety from Australia.

SUNLIGHT (Spiller) (416) 85

Strong growing light orange shading to a yellow throat. 6-8 open on a very heavy medium tall spike. Good cutter.

SURFSIDE (Winson) (400) 90

Tall late blooming white. Our favorite for late cut flower purposes. Fine easy producer of cuttable spikes.

SUSQUEHANNA (Herridge) (416) 85

Clean peach buff with a creamy throat. 8 open on a tall spike. Best low priced buff cut flower.

TARAWA (Palmer) (436) 80

Striking ruffled scarlet with white throat lines. Up to ten open with a long flower-head but short stem.

TEXAS (Buchanan) (500) 70

Large snow white with a cream throat. 6-8 open on a tall wiry spike. Very good for early or late blooms.

TRUELOVE (Klein) (440) 75

Beautifully ruffled shell pink. 6-7 blooms open on a consistently good spike. One of the best early ones.

TUNIAS MOHAMET (Both) (580) 80

Large plum rose colored smoky with a blended scarlet throat. Up to 8 open of good placement on a tall spike. Will grow to 7" or more in size with good culture.

UHU (The Owl) (Salmon) (482) 85

Unique brown and cream combination. 8 well placed blooms on a tall spike. One of our favorite medium sized smokies.

UNCLE TOM (Salmon) (590) 90

Striking deep purple maroon opening 8 on a tall spike. A dark one that is a little different in color.

VAGABOND PRINCE (Palmer) (390) 85

Mahogany brown with a bright orange scarlet blotch. Up to 10 medium sized blooms on a tall spike. A long time favorite.

VALERIA (Pruitt) (436) 80

JOIN A GLADIOLUS SOCIETY

There are gladiolus societies in nearly all localities of the country composed of glad fans of all degrees — from the backyard gardener with a few bulbs to the commercial grower with many acres. With them you may receive the benefit of their publications with the most up-to-date information of all kinds pertaining to gladiolus, good fellowship at their shows and meetings (who else can fully appreciate that 8" bloom in your garden?), and a chance to test your growing skill at the many gladiolus shows.

Our leading national society is the North American Gladiolus Council — Dues are only \$2.00 per year and entitle you to receive the N. A. G. C. Bulletin an outstanding publication of all information pertaining to gladiolus — Membership secretary — Mr. Alfonz Bazdort, Lincoln Park, N. J.

CARE AND CULTURE

(Complete planting instructions will be included with each order)

SOIL AND FERTILIZER

Glads do well on most any soil if they are planted in the open garden where there is plenty of sunshine. You may work well rotted manure into the soil in the Spring by putting it into the bottom of your planting trench, then covering with an inch of soil; then planting your bulbs. Vigoro is also good. Two or three applications of commercial fertilizer may be made on the surface along the rows during the growing season before the plants bloom. Any fertilizer should be kept from direct contact with the bulb or foliage. If you wish to grow immense spikes, you must fertilize heavily; your plants must also have at least an inch of water every three or four days.

PLANTING

Work soil to a depth of eight inches, or ten inches will be better. Large bulbs should be covered with about six inches of soil. The deeper planting helps keep them upright when blooming. Smaller bulbs should be planted not less than two inches. You may regulate your distance apart in the row by the space you have. Plant rows anywhere from 2 ft. to 3. ft. apart. Plant in rows from two to six inches apart, depending on space and number of bulbs. They do well planted close together, but require more water.

DIGGING AND STORAGE

Our early stock is taken up in early October. The bulbs should be taken up within six weeks to two months after blooming but before the tops begin to get brown. Even if the tops are green, bulbs should be taken up before the ground freezes deeply. After digging, cut off the tops close to bulb and put in screen bottomed trays to cure. They should have plenty of ventilation while curing and must not be put in containers more than three or four inches deep. At this time Naphthalene flakes (procured from your druggist) may be safely scattered on the bulbs which are dormant. Use at the rate of an ordinary handful per 100 bulbs. A little more or less won't do any harm and it will drive away any thrip that may be harboring an idea of wintering on your bulbs. By the time you are ready to clean the bulbs most of the flakes will have evaporated. A note of warning! DO NOT use them in the Spring when the root nodules appear at the base of the bulb, as they are harmful and prevent normal growth of the plant. Use them right after digging or early winter. Stir them every few days and keep dry. In four weeks they will be cured so that old bulbs may be removed from the bottoms. They may then be placed in storage. Proving very effective as a thrip control in storage is a light dusting of 5% DDT powder. This is very good if the bulbs do not have to be handled during storage as DDT powder is poisonous.

The storage temperature is best at 45 to 50 degrees. Your storage room should be dry, cool and ventilated and as near uniform as possible as to temperature. It is well to look at your bulbs every two or three weeks. If they show signs of too much moisture or look mouldy, dry them out and give better ventilation. Keep them in small containers and spread thin.

THRIP AND DISEASE CONTROL

With the advent of D.D.T. as a dust or spray for thrip on gladiolus the problem has become of minor importance. A few dustings or sprayings after the plants are about 8-10 inches high will eliminate all trouble from that source.

DDT Spray

2 rounded teaspoonfuls DDT (50% wettable). 1 teaspoonful Dreft. 2 gallons of water. Spray every 8-10 days till glads begin to bloom.

DDT Dust

Use 3 or 5% dust. Preferably use a dust also containing a good fungicide. Dust lightly every 8-10 days till glads begin to bloom.

BULB DIPS

As a disease preventative for bulbs. We recommend this as a precaution both for your old bulbs and new bulbs no matter where obtained.

LYSOL — 1 tablespoonful of Lysol. 1 gallon of water. Soak 4 to 6 hours immediately preceding planting.

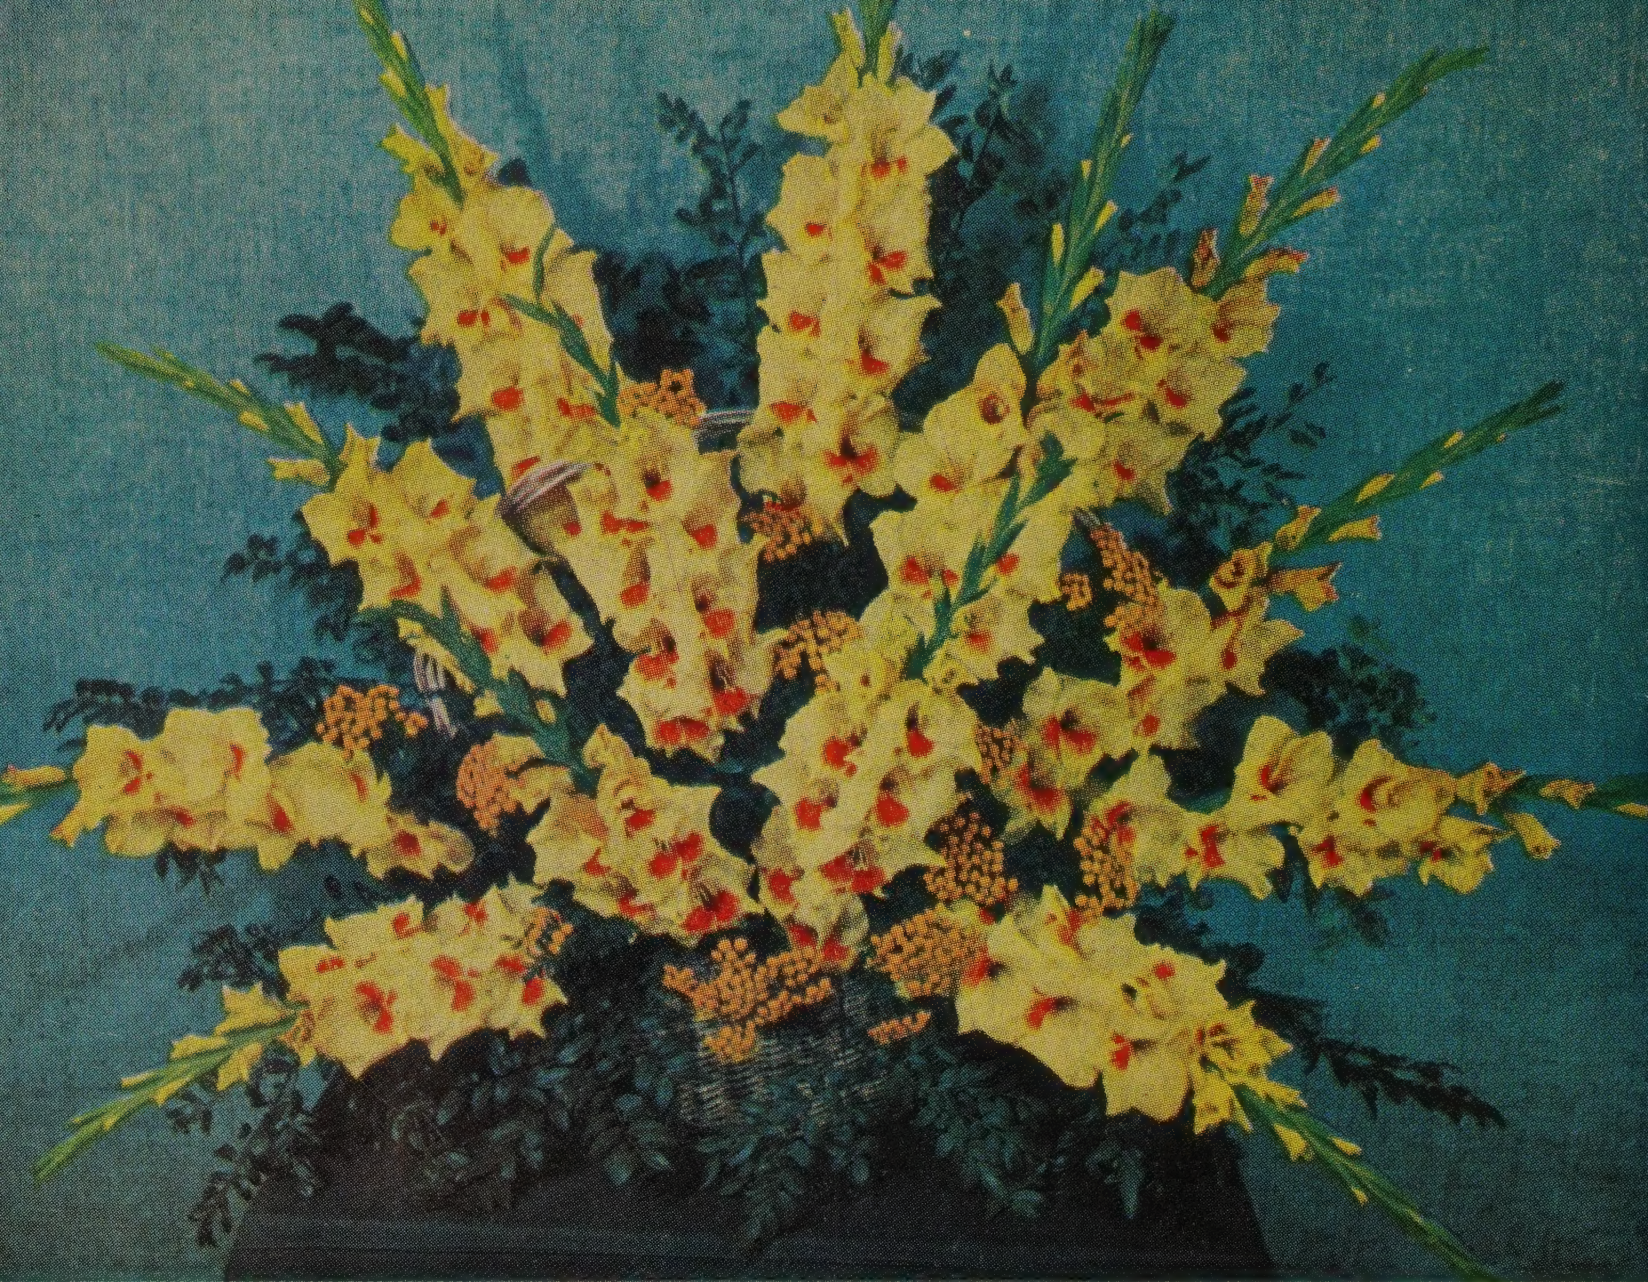

NEW improved Ceresan — 1 oz. of N. I. Ceresan. 3 gallons of water. Weigh carefully and leave bulbs in solution 15 minutes. Do not leave bulbs in solution over 20 minutes and be sure to plant immediately after dipping.
